

ACKNOWLEDGEMENTS

We wish to thank the personnel of the N.C. Division of Marine Fisheries for greatly assisting us in obtaining samples from various areas in the Albemarle-Pamlico Estuary. Without their generous help, this work could not have been completed. We would especially like to thank Mr. Shawn McKenna, Ms. Katy West and Mr. Jess Hawkins for their support and useful discussions. We also thank Mr. Steven Johnson for assistance with the tank studies with blue crabs, Mr. Bill Bowen for processing the blue crab samples and assistance with tank studies. We also thank Dr. Maurius Brouer for performing the hemocyanin determinations. We would also like to thank Dr. Marie Davidian for the excellent assistance with statistical analysis. Finally, we would like to thank Mr. Ettles Henry and the other members of the crab fishery community for their assistance with this work.
